2. The new drawings filed on May 22, 2006 have been accepted and entered.

Allowable Subject Matter

3. Claims 1-20 are allowed.
4. The following is an examiner's statement of reasons for allowance:

Regarding the claims, none of the prior art of record explicitly discloses or makes obvious, a flat panel x-ray detector, namely the specific lamination structure of the x-ray conversion film such that each of the layers of metal halide films are laminated along the c-axis of a hexagonal crystal structure, that the layers differ in band gap from one another, that the halogen atoms in the metal halide films are the same kind, and that the layers have about the same lattice constant, along with the other claimed features. Although references such as Ikeda (cited in prior office action), disclose a similar structure, the metal halide film uses amorphous materials, which do not have a crystalline structure, and therefore cannot be laminated along the c-axis.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
